

How to set up your Employee Self-Service Portal to access your Pay Stub/History

Your pay information will be available online via “Employee Self-Service”.

Employee Self-Service enables you to view your check stubs and earnings history in your private and personalized portal. The data is automatically encrypted as it travels over the Internet. Each payroll period, your current check stub and earnings history information will be posted so it is available.

Setting up Your Portal:

1. Provide your employer with a valid email address.
2. Access your registration email and click on the “Register” link to be taken to the NetClient CS registration page.
3. Enter a unique ID and password to serve as your Employee Self-Service login. NetClient CS then verifies your ID and password, which completes your Employee Self-Service Setup and Registration.

Once you have successfully registered your account, you may begin accessing Employee Self-Service via www.FREIDAG.com by clicking on "Clients' Employee" at the left side of the screen and first link under “Employee Self-Service” Paystub & Pay History.

If you have any questions, please contact your employer.
